## recycling/disassembly

### bump stool/side table

material: polyethylene, rotomoulded. u.v. stabilised

dimensions: 595mm W, 375mm H

weight: 4 kg

colours: magenta, red, orange, yellow, lime green, light green, teal, light blue, dark blue, charcoal, birch grey, beige, black, natural white.

the bump stool is a single module made entirely of a single material: rotationally moulded polyethylene. No added materials or components or finishes.

**No disassembly of the standard bump stool is required to facilitate recycling.**

**korban/flaubert product stewardship program:**

please recognise the inherent value and easy recyclability of our rotomoulded products.

This product is very simply 100% recycled, no material needs to go to landfill.

this product should be returned to us at the end of its useful life.

or arrange with us to have it collected at a negotiated transport fee. We undertake to send it to the local recycler Simsplastics who recycle the material in its entirety: regenerating into polyethylene pellets for remoulding into agricultural products such as drainage pipes.

The standard resin code no.2 for HDPE is clearly indicated on the base of the product to facilitate this.

Polyethylene shell: 4kg per stool  
average wall thickness: 4mm  
Regeneration rate: 100%  
Recycling: 100%  
Waste in recycling: 0%

designed and manufactured in australia.  
local products support energy efficient agendas by radically reducing freight carbon footprint.
